

SPECIFICATION

Sodium Hydroxide Powder

Parameters	Specification
Appearance	White crystalline powder
Molecular Weight	40.00 g/mol
Boiling Point	1390 °C
Melting Point	318 °C
Purity	98–99%
Refractive Index	1.535
Solubility	111 g/100 g water at 20 °C
Uses	Used as a strong base in chemical synthesis, soap and paper production, drain cleaning, water treatment, and pH control.
