

## SPECIFICATION

### Tetrasodium Glutamate Diacetate

| Parameters        | Specification                                                                                    |
|-------------------|--------------------------------------------------------------------------------------------------|
| CAS Number        | 51981-21-6                                                                                       |
| Appearance        | White powder                                                                                     |
| Molecular Formula | C <sub>9</sub> H <sub>9</sub> NNa <sub>4</sub> O <sub>8</sub>                                    |
| Molecular Weight  | 325.17 g/mol                                                                                     |
| Boiling Point     | 300 °C                                                                                           |
| Melting Point     | 190 °C                                                                                           |
| Flash Point       | 280 °C                                                                                           |
| Purity            | 98–99%                                                                                           |
| Refractive Index  | 1.54                                                                                             |
| Solubility        | Soluble in water                                                                                 |
| Uses              | Chelating agent for detergents, cleaners, and cosmetic formulations; stabilizer and sequestrant. |
