

## SPECIFICATION

### Trimethylamine Hydrobromide

| Parameters        | Specification                                                                 |
|-------------------|-------------------------------------------------------------------------------|
| CAS Number        | 2840-24-6                                                                     |
| Appearance        | White crystalline solid                                                       |
| Molecular Formula | C <sub>3</sub> H <sub>10</sub> BrN                                            |
| Molecular Weight  | 140.02 g/mol                                                                  |
| Boiling Point     | 202 °C                                                                        |
| Melting Point     | 168 °C                                                                        |
| Flash Point       | 210 °C                                                                        |
| Purity            | 98–99%                                                                        |
| Refractive Index  | 1.430                                                                         |
| Solubility        | Soluble in water                                                              |
| Uses              | Reagent for organic synthesis,<br>intermediate in pharmaceutical<br>synthesis |
