

## SPECIFICATION

### Watermelon Oil

| Parameters       | Specification                                   |
|------------------|-------------------------------------------------|
| Appearance       | Pale yellow oil                                 |
| Molecular Weight | 875 g/mol                                       |
| Boiling Point    | 300 °C                                          |
| Melting Point    | -5 °C                                           |
| Flash Point      | 200 °C                                          |
| Purity           | 98–99%                                          |
| Refractive Index | 1.463                                           |
| Solubility       | Insoluble in water; soluble in organic solvents |
| Uses             | Cosmetic ingredient; edible oil                 |
