

## SPECIFICATION

### White Silica Gel Beads

| Parameters       | Specification                                |
|------------------|----------------------------------------------|
| Appearance       | White beads                                  |
| Molecular Weight | 60.08 g/mol                                  |
| Boiling Point    | 223                                          |
| Melting Point    | 1713 °C                                      |
| Purity           | 99–99.9%                                     |
| Refractive Index | 1.46                                         |
| Solubility       | Insoluble in water                           |
| Uses             | Desiccant and adsorbent for moisture control |
